## **Energy performance certificate (EPC)**

5 Clanbrassil Court HOLYWOOD BT18 0EQ Energy rating

Valid until:

13 January 2032

Certificate number: 5200-5529-0822-4195-3923

Property type

Top-floor maisonette

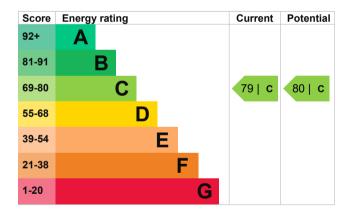

Total floor area

357 square metres

# **Energy efficiency rating for this property**

This property's current energy rating is C. It has the potential to be C.

See how to improve this property's energy performance.

The graph shows this property's current and potential energy efficiency.

Properties are given a rating from A (most efficient) to G (least efficient).

Properties are also given a score. The higher the number the lower your fuel bills are likely to be.

For properties in Northern Ireland:

the average energy rating is D the average energy score is 60

## Breakdown of property's energy performance

This section shows the energy performance for features of this property. The assessment does not consider the condition of a feature and how well it is working.

Each feature is assessed as one of the following:

- very good (most efficient)
- good
- average
- poor
- very poor (least efficient)

When the description says "assumed", it means that the feature could not be inspected and an assumption has been made based on the property's age and type.

| Feature              | Description                                | Rating    |  |
|----------------------|--|-----------|--|
| Wall                 | Cavity wall, as built, insulated (assumed) | Good      |  |
| Roof                 | Pitched, 150 mm loft insulation            | Good      |  |
| Window               | Fully double glazed                        | Average   |  |
| Main heating         | Boiler and radiators, mains gas            | Good      |  |
| Main heating control | Programmer, TRVs and bypass                | Average   |  |
| Hot water            | From main system                           | Good      |  |
| Lighting             | Low energy lighting in all fixed outlets   | Very good |  |
| Floor                | (another dwelling below)                   | N/A       |  |
| Secondary heating    | Room heaters, dual fuel (mineral and wood) | N/A       |  |

#### Primary energy use

The primary energy use for this property per year is 120 kilowatt hours per square metre (kWh/m2).

| Environmental impa<br>property   | act of this      | This property produces   | 7.9 tonnes of CO2 |
|--|------------------|--|-------------------|
| This property's current environmental impact rating is C. It has the potential to be C.          |                  | This property's potential production   | 7.5 tonnes of CO2 |
| Properties are rated in a scale from A to G based on how much carbon dioxide (CO2) they produce. |                  | By making the <u>recommended changes</u> , you could reduce this property's CO2 emissions by 0.4 tonnes per year. This will help to protect the environment. |                   |
| Properties with an A rating than G rated properties.   | produce less CO2 | For the constant in the starting   |                   |
| than O rated proportion.   |                  | Environmental impact ratin assumptions about average   | _                 |
| An average household produces  | 6 tonnes of CO2  | energy use. They may not consumed by the people liv  |                   |

### How to improve this property's energy performance

Making any of the recommended changes will improve this property's energy efficiency.

If you make all of the recommended changes, this will improve the property's energy rating and score from C (79) to C (80).

Recommendation Typical installation cost Typical yearly saving

**1. Increase loft insulation to 270 mm** £100 - £350 £75

#### Paying for energy improvements

Find energy grants and ways to save energy in your home. (https://www.gov.uk/improve-energy-efficiency)

# Estimated energy use and potential savings

Estimated yearly energy cost for this property

Potential saving £1623

The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property.

The estimated saving is based on making all of the recommendations in <u>how to improve this property's energy performance</u>.

#### Heating use in this property

Heating a property usually makes up the majority of energy costs.

# Potential energy savings by installing insulation

The assessor did not find any opportunities to save energy by installing insulation in this property.

### Contacting the assessor and accreditation scheme

This EPC was created by a qualified energy assessor.

If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation schemes are appointed by the government to ensure that assessors are qualified to carry out EPC assessments.
